2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-10 are rejected under 35 U.S.C. 102(e) as being anticipated by **Ellis et al (2005/0028208)**.

As to claim 1, Ellis discloses an information processing system, comprising: a recording apparatus; a personal computer configured to access the recording apparatus;

A personal computer (Server 80, figs.1-4 and 31+) configured to access the recording apparatus (figs.3 and 4, [0087-0088] and [0195-0196]);

an information processing apparatus (Remote Access Device 'RAD' 24) comprising: control means including, user controlled acquisition means for acquiring, without accessing the personal computer, control information for controlling preset recording of a program by accessing a remote program information providing server through the internet based on a user request to access the remote program information providing server, (figs.1-3, [0018-0019], [0025-0026] and [0071-0077], [0087-0088] and [0099-0100])

Conversion means for converting contents described in said control information acquired by said acquisition means into code information for setting said program preset recording to the recording apparatus, which is remote from the control means ([0018-0019], [0071-0077], [0087-0088] and [0099-0100]); and

Transmission means for receiving said code information from said conversion means and for transmitting said code information obtained by said conversion means to said recording apparatus under control of said control means; the recording apparatus receiving said code information from said transmission means, confirming whether said code information properly sets said program preset recording, and displaying whether said program preset recording is proper or improper ([0018-0019], [0071-0077], [0087-0088] and [0099-0100]).

As to claim 2, Ellis further discloses where the code information acquired by the acquisition means is G-code, information ([0067], [0120], [0130], [0158 and [0165]).

As to claim 3, Ellis further discloses where the transmission means transmits the code information to the recording apparatus by use of an infrared signal ([0018-0019], [0071-0077], [0087-0088] and [0099-0100]).

As to claim 4, Ellis further discloses where control information includes broadcast channel information, broadcast date, broadcast start time, and recording end time of said program ([0018-0019], [0071-0077], [0087-0088] and [0099-0100]).

As to claim 5, the claimed “An information processing method for use in a system including a personal...” is composed of the same structural elements that were discussed with respect to the rejection of claim 1.

As to claim 6, the claimed “A program storage medium storing a computer-readable program...” is composed of the same structural elements that were discussed with respect to the rejection of claim 1.

As to claim 7, the claimed “An information processing system, comprising...” is composed of the same structural elements that were discussed with respect to the rejection of claim 1.

Claim 8 is met as previously discussed with respect to claim 2.

Claim 9 is met as previously discussed with respect to claim 3.

Claim 10 is met as previously discussed with respect to claim .4

necessitated the new ground(s) of rejection discussed above. This office action is non-final.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Yukie et al (6,956,833) disclose method, system and devices for wireless data storage on a server and data retrieval.

Ferris et al (2006/0288374) disclose communication system and method.
